The References of Engineer Maher Fathi Al-hesen

Mr **Maher Fathi Al-hesen** has studied at the faculty of Engineering of the Al-Balqa Applied University since October 2002. During this period he has proved that his qualifications and the level of knowledge are very high. He worked under my supervision the graduation project entitled "PC Remote Control" trying to find new technical original solutions to implement it in the project, showing a broad knowledge in the Digital System Design and in the Control Systems.

During the period of his study he had take many courses under my custody and he had proven his self as competent and qualified particular in Digital System Design, Wireless Communications, Computer Architecture, Communication Systems, Embedded systems and Operation systems.

Therefore I can strongly recommend his candidature for a Master degree at any academic university.

Sincerely yours,
